

## 10 Step Systems Thinking Framework to Build Capacity for Resilience

1	Identify person, group, populations
2	Gauge environment, equity & inclusion
3	Assess stressors, social exclusion
4	Integrate & share knowledge
5	Survey multi-systems resilience resources
6	Engage stakeholders, organizations & communities
7	Plan prevention & intervention strategies
8	Evaluate policy & political ecology
9	Address professional development
10	Obtain ongoing feedback
